

JeTS(Jeisys Technical Seminar)

Jeisys Medical ran a seminar named JeTS(Jeisys Technical Seminar) with asian engineers from March 27 ~ April 1, in Thailand.

This program was a first seminar for engineers about technical service information what other companies haven't tried yet.

Through this seminar, we were trying to give them very useful information about technical side of the product and we think that all participants have been satisfied with it.

We are sure it would be very useful to them in every corner of the trouble issues.
Let's meet at the next JeTS!
