

Jeisys Medical held international symposium (SALSA) for the first time as an aesthetic medical company in Korea.

- Renowned international symposium with 150 participants from 13 countries

Jeisys Medical (www.jeisys.com, representative: KANG, Donghwan), an aesthetic medical company in Korea, held an international symposium on its own for the first time as an aesthetic medical company in Korea, drawing much interest in the industry.

The event was held for two days from June 29 to June 30 in Phuket, Thailand, the famous beautiful vacation spot, with about 150 participants present in this large scale-international symposium from 13 countries including Asia, America, Europe, and India.

In the event presided by YEO, Uncheol as the first president, which has been formally called Star Asia Laser Surgeons Allies (SALSA), 12 orators from 10 countries, from both home and abroad attended as speakers including Dr. Sherry Thomas from the US, Dr. July Jaimes Suarez from Spain, Dr. Ungku Shahrin from Malaysia, and Dr. Vivek Mehta from India.

Notably, LIPOcel™, Jeisys' device for treating fats with Europe CE certification, drew much attention, and the person from Jeisys Medical said that the product might have gained interest among participants due to the excellent effect in relatively short time with little pains to patients despite of high energies through patented function of Contact Cooling system.

Along with the LIPOcel, ULTRAccl, making renewed boom of sales due to upgraded functions, TRI-BEAM, which is a Nd:YAG device maintaining continued reputations, and Edge ONE, which is a CO2 laser device were introduced with diverse research results and apply methods.

The marketing personnel of the Jeisys Medical said, SALSA symposium, which has confirmed its reputation as the global corporation, will be held continuously with various programs based on the success of the first meeting,

presenting much expectations in the future.
